Acme Corp Q3 Board Pack

Executive Summary

Acme Corp entered Q3 with board alignment on west region expansion across Denver, Phoenix, and Salt Lake City. Revenue grew 12 percent year over year in the west division, driven by enterprise renewals and two new healthcare logos signed in May. The executive team confirmed vendor consolidation as the top operating priority for the remainder of the year.

Finance requires a refreshed ROI model before the June 28 executive sync. Operations owns the vendor cutover plan with a July 15 readiness target. Legal completed redlines on the primary SaaS agreement on June 20. The board expects a single narrative on expansion timing, staffing, and vendor risk at the next meeting.

West Region Expansion

Denver: Facility timeline approved March 15. Real estate selected in the LoDo district. Hiring plan calls for 18 FTE by September, including 6 senior implementation consultants. Local partner Apex Systems submitted staffing proposals June 18.

Phoenix: Market assessment completed April 30. Client pipeline includes three qualified enterprise opportunities. Board asked for conservative revenue recognition until Phoenix general manager is hired. Recruiting kickoff scheduled July 8.

Salt Lake City: Still in feasibility. Operations requested Q4 decision gate. CFO Lisa Park noted capital constraints if all three metros launch simultaneously.

Vendor Consolidation Program

Current state: Acme runs 14 overlapping SaaS vendors across CRM, ticketing, analytics, and document workflow. Annual spend estimated at 4.2M with 23 percent duplicate capability.

Target state: Consolidate to 6 strategic vendors by Q1 next year. Maria Santos leads cutover planning. Phase 1 migrates analytics and reporting by August 30. Phase 2 migrates customer success tooling by October 15.

Key risks: Data migration windows, training load on client success managers, and temporary reporting gaps during cutover weekends.

Financial Outlook

Q3 revenue forecast: 48.6M with west region contributing 11.2M. Gross margin stable at 61 percent. Operating expense growth tied to expansion hiring.

ROI model assumptions: Denver break even month 14, Phoenix month 18, combined west region IRR 19 percent under base case. Stress case delays Phoenix launch one quarter and reduces IRR to 14 percent.

Lisa Park requested scenario tabs for board sensitivity on staffing delays and vendor migration overruns.

Open Decisions for Board

Approve Denver hiring plan and recruiting budget of 1.1M.

Confirm July 15 vendor cutover readiness review as a gating milestone.

Decide whether Phoenix launch remains Q4 or moves to Q1 pending GM hire.

Ratify executive communication plan for client-facing teams before cutover weekends.

Appendix: Facility and Stakeholder Map

Executive sponsors: James Wright CEO, Lisa Park CFO, Maria Santos COO, David Chen CRO.

Program leads: Sim Patel client delivery, Nora Ali vendor PMO, Kevin Brooks west region GM Denver.

Facilities referenced in Q3 materials: Denver LoDo office, Phoenix Tempe satellite, Portland client site visit notes, Salem workflow pilot.

This document supports the Q3 Business Review project and should be read alongside the June 27 executive call transcript and Denver site visit notes.
